CAREER OBJECTIVE

Passionate **MERN Stack Developer** with hands-on experience building **Full-Stack Web Applications** using **React**, **Node.Js**, **Next.Js Express**, & **MongoDB**.I aim to apply my skills in **UI/UX**, **Responsive Design**, **problem-solving**, and **teamwork** to deliver clean, user-focused applications. I am eager to grow in a collaborative team environment, learn agile practices through real-world projects, and contribute to creating efficient and high-quality digital solutions.

EDUCATION

BSc in Computer Science & Engineering (2022-Present)
Port City International University

PROJECTS

1. TravelEase : Live Site | GitHub (Client site) | GitHub (Server Site)

TravelEase is a comprehensive, modern web application designed for seamless vehicle booking and trip management.It connects users looking for transportation (from SUVs to electric cars) with vehicle owners via a simple, secure, and intuitive platform, emphasizing robust authentication and dynamic UX.

- **Smart Booking System:** Users can filter vehicles by category & book instant.
- **Owner Dashboard:** Vehicle owners can add new vehicles and manage their listings.
- **Technology:**React, TailwindCSS, Node.js, Express, MongoDB, Firebase Auth, Axios, Framer Motion

2. AssetVerse : Live Site | GitHub (Client Site) | GitHub (Server Site)

AssetVerse is a B2B (Business-to-Business) full-stack web application designed to help organizations manage company assets efficiently. HR managers can track, assign, approve, and analyze assets, while employees can request, manage, and return assigned assets – all from a centralized dashboard.

- **Asset & Employee Management System:** Developed a full-featured role-based system to manage company assets, employee requests, approvals, affiliations and payment integration.
- **Secure Authentication:** Implemented JWT-based middleware authentication for HR & Employee roles.
- **Technology:** React, TailwindCSS, Node.js, Express.js, MongoDB, Stripe, JWT, Framer Motion.

SKILLS

Frontend: HTML, CSS, TailwindCSS, React.js, Next.js, JavaScript, React Router, Framer Motion, Axios
Backend: Node.js, Express js, JWT, CORS, REST APIs
Database & Tools: MongoDB, Firebase Auth, GitHub, VS code
Deployment: Vercel, Netlify, Firebase
Soft Skills: Quick Learning Ability, Team Work & Collaboration, Good Communication

Certification

Complete Web Development Bootcamp (MERN) - Programming Hero

Language

- Bangla (Native)
- English (Professional Proficiency)
- Hindi (Basic Communication)
